

## Clinical Symposium

Friday 25th November 2011

The Safety of Knowing More

### The Role of Oximetry and Brain Monitoring in Improving Outcomes

**Covidien is delighted to invite delegates attending the SIVA UK ASM at AMD Sandhurst to a clinical symposium on NIRS and BIS™**

NIRS (near Infrared Spectroscopy) can be used as a non-invasive monitoring technique for cerebral oxygenation and haemodynamics.

The In-Vivo Optical Spectroscopy (INVOS™) System provides site-specific insights on perfusion adequacy and perfusion distribution across the brain and body.

Monitoring site-specific perfusion often provides an earlier warning of developing pathology and deteriorating patient condition than systemic measures or laboratory tests which can remain normal even when ischaemia is occurring at the regional level.

Given the complexity of the decisions you face, it makes sense to incorporate the added security of BIS™ monitoring into your practice. Used in millions of procedures requiring anaesthesia, BIS™ technology can provide insight into the direct and patient-specific effects of anaesthesia on the brain.

#### Faculty

- **Chair - Dr Douglas Russell**, Past President of the Society for Intravenous Anaesthesia, Glasgow
- **Professor Stefan Schraag**, Department of Anaesthesia and Perioperative Medicine, Golden Jubilee National Hospital, Clydebank
- **Dr Sean Bennett**, Consultant Anaesthetist Cardiothoracic Surgery and Intensive Care, Castle Hill Hospital, Hull

**The symposium will take place immediately after the Annual Scientific Meeting of the Society of Intravenous Anaesthesia on Friday 25th November, 2011 at AMD Sandhurst at 13.00**

Lunch will be provided.

### Agenda

<b>13.00-13.05</b>	Introductory remarks (lunch available)	
<b>13.05-13.10</b>	Opening and welcome	<b>Dr Douglas Russell</b>
<b>13.10-13.40</b>	How does BIS™ help to titrate intravenous anaesthesia	<b>Prof Stefan Schraag</b>
<b>13.40-14.10</b>	Cerebral oximetry - the next standard of care in monitoring?	<b>Dr Sean Bennett</b>
<b>14.10-14.25</b>	Panel discussion including Q&A	
<b>14.25-14.30</b>	Summary and close	<b>Dr Douglas Russell</b>

**For more information about this symposium, please email [ben.cole@covidien.com](mailto:ben.cole@covidien.com)**

**1 CPD point approved by The Royal College of Anaesthetists**
